Professional Profile

Mobile Developer with over 5 years of experience, specializing in **Android (Kotlin, Java, Jetpack Compose)** and with experience in **iOS (Swift, SwiftUI)**. Strong focus on **Kotlin Multiplatform (KMP)** for developing cross-platform solutions. Experienced in building **scalable, secure, and high-impact applications**, including **mission-critical systems with real-time processing**. Strong knowledge of **Clean Architecture, Firebase, REST APIs, Docker, and databases**. Interested in contributing to **international teams with strong technical expertise**.

Education

Instituto Tecnológico de Durango (Graduate)

B.S. in Computer Systems Engineering – Specialization in Data Science (2016 – 2021)

CBTis No. 109

Programming Technician (2013 – 2016)

Professional Experience

Mobile Developer – Informática Electoral

Culiacán, Mexico | 04/2023 – Present

- Led the development of **native Android, native iOS, and KMP mobile applications**.
- Designed and developed **Android & iOS solutions** using **Jetpack Compose and SwiftUI**.
- Implemented **CI/CD (GitHub Actions)** and **Fastlane** for automated testing, builds, and releases.
- Used **MobSF** to identify and remediate security vulnerabilities in Android and iOS applications.
- Automated deployments to the **Google Play Store and App Store (TestFlight)**.
- Experience developing **scalable and highly available systems**.
- Collaborated on backend projects using **Spring Boot, REST APIs, and Docker**.

Android Developer – Shitsu

Durango, Mexico | 08/2021 – 04/2022

- Designed an application for **university residence registration**, connecting students with companies.
- Implemented secure authentication, résumé uploads, and automated email notifications.
- Developed a **REST API** for storing student information using **Spring Boot and Java**.

Freelance Project – GYM Application

Durango, Mexico | 07/2022 – 09/2022

- Developed a customized application for **workout routines and diet plans**.
- Implemented a user system with individual progress tracking and daily workout notifications.
- Developed a **REST API** for user and workout management using **Spring Boot and Java**.

Languages

- **Spanish:** Native
- **English:** Intermediate Technical
